COLLEGE PROJECT

- Deal My Books** - Where everyone can Purchase or Sell books (Django/python, MySQL)
It was our college's final year project, we created a web application where everyone can Register/Login and **purchase/sell** books they want, It was **industrial based project**, We made it with help of **CreArt Solutions**, we were four in our group and I **personally contributed as Full-Stack** developer. [[certificate](#)]

PERSONAL PROJECTS

- VEER'S BLOG** - Online platform for Blogs (FLASK/Python, PostgreSQL)
Its a Blogging webapp where user can Register/Login, read interesting blogs that I write and **comment** on particular blog they want [[Preview](#)]
- Color Extractor** - Find top colors from images (FLASK/Python, PostgreSQL)
Its an website where user can get colors from any **jpg/png** image they want, I made it using **NumPy**. [[Source Code](#)] [[Preview](#)]
- Todo List** - Make Todo's and organize work (Flask/Python, PostgreSQL)
a web application wehre user can **securely** login/register and make their todo list to complete their work on time.[\[Source code\]](#).
[\[Preview\]](#)

TRAINING

- [100 Days of Code Python](#)
- [Project Intern in Creart Solutions](#)
